REASONS FOR ALLOWANCE

The following is statement of reasons for allowance of claims 1-32: The present invention is a method and a system of reducing noise in a video image. Independent claims 1, 12 and 22 identify the uniquely distinct features "selecting threshold values based on the relationship between the noise standard deviation of different decomposition levels in the transform domain and the noise standard deviation of the original video image and applying a thresholding function to the transform coefficients of the classes of data in different resolution levels with different selected threshold values". The closest prior art to Vincent (US 6,741,739) and Mastura et al. (US 6,975,753) disclose reducing noise in video image, decomposing the video image by a transform into a multiple resolution levels representing different classes of image data and applying threshold to transform coefficients, however either singularly or in combination fail to anticipate or render above limitations obvious.

Communication

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sherali Ishrat whose telephone number is 571-272-7398. The examiner can normally be reached on 8:00 AM - 4:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Matthew Bella can be reached on 571-272-7778. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
